Room to read. A labyrinth at the edge of attention.

Recommended direction A: an expansive, asymmetric opening, a clear route to the book, and a quiet reading surface. The full sixteen-band labyrinth stays larger than the viewport.

01 / DESKTOP OPENING / 1,120 × 900 CSS PIXELS

02 / THE DESIGN LANGUAGE

NIBBIDĀ

Warm charcoal. Quiet, expansive structure.

The maze opens toward the right. Its turns continue beyond the page; no small repeated pattern competes with the words.

EB Garamond

Literary headings and reading text. Compact sans-serif labels and buttons establish a clear functional hierarchy.

Ground · maze · primary text · supporting text · accent

> 2,350 px labyrinth diameter on desktop and phone. Reposition the crop; keep its scale.

The 06A emblem retains all its paths, including the opaque inner details. Only its colors match the page.

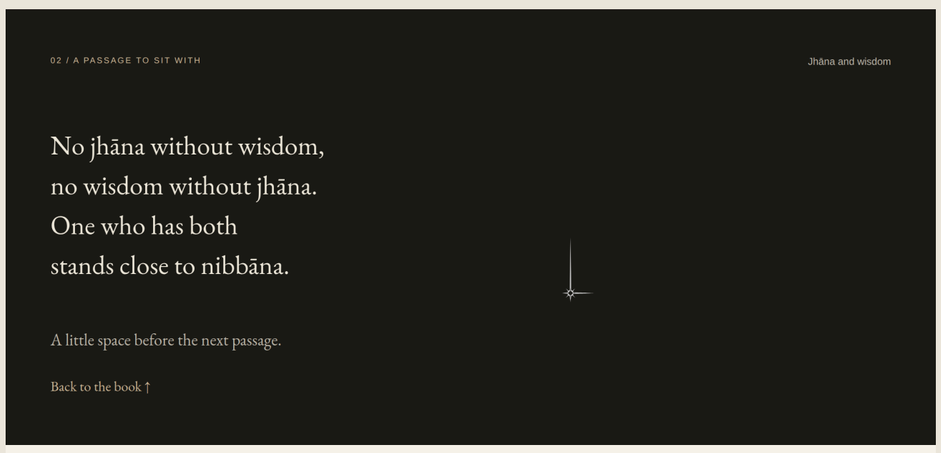

The identity shown here is the supplied emblem with a typeset name; it is not a replacement master wordmark.

03 / PHONE / 390 × 900 CSS PIXELS

Center of the maze beyond the right edge. Header, book information, and actions remain readable.

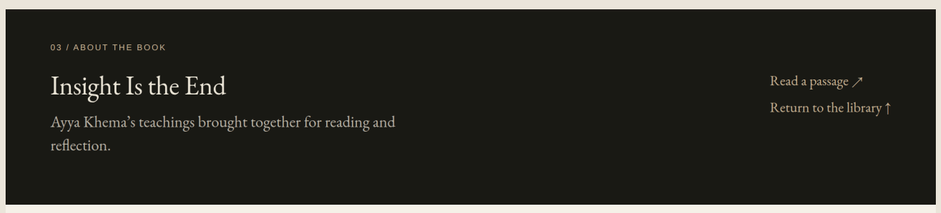

04 / THE READING SURFACE

Decoration gives way to the passage.

The C5-B corner sits outside the lines of the verse. The passage is unchanged and has no footnote.

05 / BOOK INFORMATION

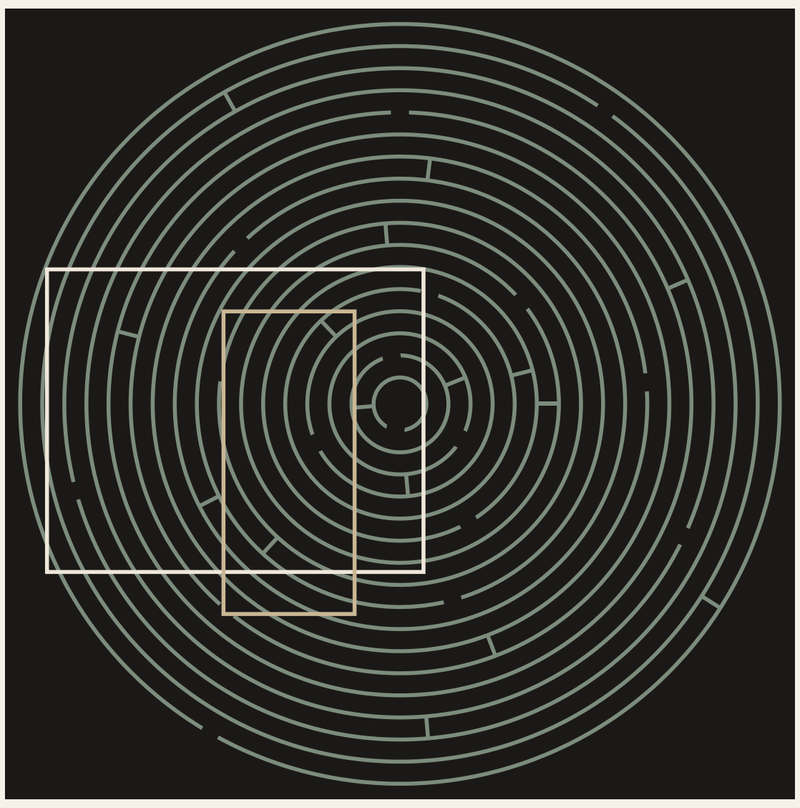

A restrained family of applications

Large maze crop for arrival; smaller crop for the illustrative cover; a plain reading panel; E2 at the closing transition.

06 / ONE FIELD, TWO CROP WINDOWS

Explanatory contrast only. Ivory: desktop. Stone: phone. Outlines show crop windows before plain content panels cover the background.

The background is much quieter.

Use the actual dark treatment above. The diagram explains the geometry; it is not the proposed background contrast.

Supplied artwork preserved in the reference folder; editable color derivatives supplied separately. No gradients, shadows, texture, parallax, or repeated maze tiles. Cover and supporting copy are illustrative. Open the responsive preview ↗
